## Virtual Showroom: Italian Craftmanship

... If you are aesthetes, collectors, connoisseurs, if you are self-centred, demanding and exhibitionists, if you own already everything, have refined taste, love to spoil yourselves (and you can afford it), here you will find something adequate.

... In this Virtual Showroom we are gathering unique objects we are the first to love, selected among the best production of our clients, but not only that.

Our selection work is not over, anyhow...

... Here there is not an e-commerce, or direct sales proposals; the producers of the objects in the Showroom usually look for Importers and/or Distributors.

These are suggestions, ideas, that can be developed.
